

METALLIC EPOXY PIGMENTS

DESCRIPTION

Our Epoxy Pigments are stable dispersions of dry organic/ inorganic pigment powders in a saturated polymeric plasticizer. They are used for coloring epoxy resins/hardner systems for all epoxy based applications.

PROPERTIES OF THE PIGMENTS

- Light Fastness
- Heat Resistance
- U.V. Resistance
- Outdoor durability
- Chemical Resistance
- Electrical Properties
- Coverage Properties
- Stability
- Uniform dispersion

RANGE OF COLOURS

A wide range of colors are manufactured as per our standard color chart. In addition, pigment colors are matched to BS, IS and RAL shades other than special shades as per customer's requirements.

PACKING DETAILS

Available in 1Kg, 5Kg, 10Kg.

SHELF LIFE

12 Months from the date of manufacturing.
